Techno Acoustic **Wooden Slats**

Introducing Techno Acoustic Wooden Slats, manufactured for the 1st time in India. A make in India initiative by Techno Acoustics These are aesthetically appealing, high performance and durable sound absorptive wall panels.

Larger than the conventional panel, this versatile variant envelops areas and provides acoustic enclosures without the feeling of confinement. Can prudently divide space without adding a drab/dour effect, lending a certain uniqueness to existing built environments. These panels provide endless interior decorating ideas for enhancing interior aesthetics.

Thickness

10mm Nonwoven Polyester Acoustic Panels + 11 mm Wooden Slat

Sound Absorption

Up to 0.9NRC

Cell Size

600 mm x 2400 mm

Material

Non-Woven Polyester Fiber Acoustic Panel

Density

180 kg/m³

Installation

Follow the below steps :

- Attach the slats directly to the wall/ceiling at a distance of 600 mm.
- Use screws to mount the wood panel walls directly to the slats. We recommend using 35mm x 3.5mm black screws secured through a felt backing.
- The panels can be easily cut to the right width using a regular hand saw, while the acoustic felt can be cut vertically using a utility knife.
- For the best acoustic solution, you can place insulation between the slats.

Available in any wood finish species, these panels also allow you to customise the stripe and pitch sizes, making them as wide or narrow as required.
